

What is SmartWay?

- Voluntary Partnership between EPA and the freight industry aimed at reducing fuel consumption as well as greenhouse gases and other air emissions.
- Developed jointly by EPA and several carriers and shippers, including Schneider, Swift, Yellow/Roadway, UPS, FedEx, The Home Depot, and IKEA.
- Freight industry interests – reduced fuel consumption and improved public image.
- EPA interests – reduced emissions (CO₂, NO_x, PM) and improved energy security.

SmartWay Emission Reduction Goals

- 33 million metric tons of CO₂ annually by 2012.
- 200,000 metric tons of NO_x annually, with additional reductions in PM and air toxics.
- 150 million barrels of oil annually (equivalent to removing 12 million cars from the road).

How SmartWay Works

- Partners receive benefits, including technical assistance and recognition. Most importantly, they save money by saving fuel.
- Freight Carriers (Trucking and Rail Companies) – Agree to work toward improved efficiency and reduced fuel consumption over a 3-year period.
- Freight Shippers – Agree to work toward shipping more of their product with SmartWay Carrier Partners, as well as improving their operations.
- Logistics Companies – Agree to work toward bringing contracted carriers into the Partnership, as well as shipping more freight with SmartWay Carrier Partners.
- Affiliates – Agree to work to promote SmartWay to their members and constituents.

Current Partners

- 447 freight shippers, carriers, logistics companies, and affiliates in 41 states, with 32 Partners based in Canada (as of July 31, 2006).

Public Service Announcement Campaign

- Initiated in Dec. 2004 to raise awareness of the Partnership among industry and the public.
- 5 PSAs developed and placed in more than 25 publications.
- Multiple free full-page or multi-page placements received from Forbes, Business Week, Inc., and Fast Company.

CALCULATE YOUR SAVINGS
TO THE ENVIRONMENT. TO YOUR BOTTOM LINE.

For logistics managers, SmartWay can add up to 7% in fuel savings.

SmartWay Transport helps shippers and for-hire carriers lower greenhouse gases and other emissions, while at the same time giving the average truck a fuel savings of \$2,000 per year.

To find out more about this new partnership, call for your info kit at 1-734-214-4767 or log onto www.epa.gov/smartway.

What SmartWay Partners are Saying

"Our participation in SmartWay is an important piece of our global fleet strategy. With our first sustainability report issued last fall, we set aggressive goals for reducing emissions and increasing fuel efficiency. SmartWay provides another way to push ourselves to meet, and exceed, those goals."

-- Mike Herr, V.P. of Environmental Affairs, United Parcel Service (UPS)

"I encourage everyone to join Swift in becoming a member of SmartWay. The very worst thing that'll happen to you is you'll save fuel which means you'll make more money."

-- Dave Berry, Vice President Swift Transportation

"By designing this program, it shows me and other carriers that EPA is concerned about our business as well as clean air."

-- Rick Coomes, President, Coomes Inc.

"SmartWay...incorporates elements that we feel are consistent with how we approach our business and how we want our service providers to approach things as well."

-- Sabina Strautman, Environmental Transport, IKEA USA

"H-E-B has always believed in putting customers and community first. Being a good neighbor means safeguarding the health and welfare of our customers and Partners. SmartWay Transport offers opportunities to learn and lead the way toward a clean transportation future."

-- Charles Butt, Chairman and CEO, H-E-B

"By joining SmartWay Transport Partnership, Bison Transport demonstrates its strong environmental leadership and corporate responsibility. SmartWay Transport is a perfect fit for us as an organization, and its goals tie directly into Bison Transport's on-going mission of becoming more efficient and environmentally responsible."

-- Don Streuber, President & CEO, Bison Transport

"Averitt Express understands that the future of our world rests on the investments we make to care for the resources of today. Whether that manifests itself as following safe driving and freight handling procedures or fulfilling our obligation to protect the environment through avenues such as EPA's SmartWay program, Averitt Express is answering the future's call."

-- Scott Wolf, Vice President of Corporate Services, Averitt Express

"Part of the mission of Interface, Inc. is to honor the places where we do business by endeavoring to become the first name in industrial ecology. We are striving for zero emissions in our operations, including the transportation of our raw materials and finished products. We believe that cooperative initiatives, such as SmartWay Transport, are an important step toward measuring and reducing our environmental ground transportation footprint."

-- Michael Bertolucci, Senior Vice President, Interface, Inc.

SmartWay Transport Partnership Partner List

(447 Partners as of July 31, 2006)

Freight Carriers (Trucking) – 313 Partners

Overview of Fuel-Saving and Emission-Reduction Technologies

The SmartWay Transport Partnership is establishing several innovative financing programs, such as low-interest loans, to make these highly fuel-efficient, low emitting technologies more accessible to interested trucking companies. Greater use of these technologies will not only reduce fuel consumption and related costs to trucking companies, but it will also result in reductions in emissions of greenhouse gases and other harmful air pollutants.

Disclaimer: The benefits described in this document are estimations only, and are based on a number of assumptions. Actual fuel savings and emission reductions may be higher or lower, and will depend on a variety of factors, including equipment type, driver performance, distances traveled, vehicle speed, etc.

Technology	Description	Cost	Benefits ³
Idle Reduction Device – Bunk Heater	 <p>Small, lightweight, diesel fuel-fired device mounted in the cab that provides heat for cab comfort. Does not include any air conditioning capabilities.</p>	Approx. \$1,000	<p>Approx. 5% fuel savings assuming 1,200 hours idling per year.</p> <p>Additional reduction in engine wear-and-tear.</p>
Idle Reduction Device – Auxiliary Power Unit	 <p>Small diesel-powered generator mounted outside the cab that provides heat, air-conditioning, and electrical power to run appliances.</p>	Approx. \$6,000 - \$8,000	<p>Approx. 8% fuel savings assuming 2,400 hours idling per year.</p> <p>Additional reduction in engine wear-and-tear.</p>
Single Wide Tires	 <p>Traditional dual tires are replaced with one single wide tire and aluminum wheel. Can be applied to all tractor and trailer tire positions except for the steer tires.</p>	Approx. \$3,000	Approx. 4% fuel savings.
Trailer Aerodynamics	 <p>Fairings added to the front and underside of the trailer to reduce drag.</p>	Approx. \$2,400	Approx. 5% fuel savings.

³ All savings assume a Class 8B tractor trailer traveling approximately 100,000 miles per year
